# Tax story of Pakistan

< Number of Tax Filers  
by Province >

This is how I expect the distribution of number of tax filers across provinces of Pakistan to look like. Punjab will have the most tax filers, followed by Sindh, Baluchistan, KPK and Gilgit-Baltistan (GB). Since Punjab is the most populous it will lead by a margin. Sindh has Karachi, so it will also have some margin on the other provinces. But the rest of them won't have that much of a difference in terms of the number of tax filers.

BALUCHISTAN

KPK

GB

0bn

50 bn

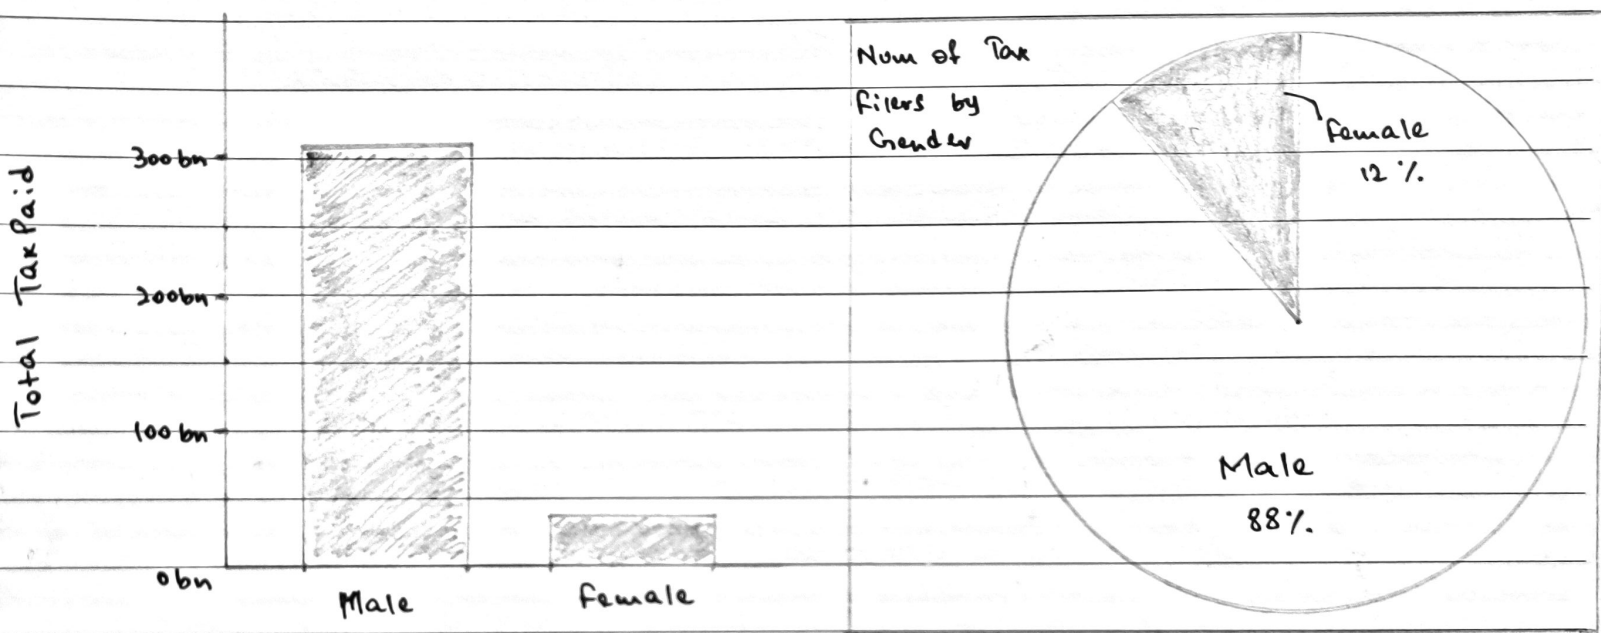

100bn

Total Tax Paid

This is what I expect the total amount of tax paid across provinces of Pakistan to look like. Since Punjab is the most populous province, it should be paying the highest tax of all the provinces. Sindh will be a close number two because of Karachi, which is often called the economic hub of the country. Then will be Balochistan and KPK. Followed by Gilgit-Baltistan (GB) with the least amount of tax paid because it also has the least number of tax filers.

# Tax story of Pakistan

## < Tax Filers and Tax Paid by Gender >

This is how I expect the number of tax filers by gender (right) to look like. This is because most of working population is men and they pay the income taxes, hence more men, or majority of the population will be men who are tax filers. Percentages are just a guess.

Since, majority of the taxpayers are men it makes sense that a large chunk of the total income tax is also paid by men. The left chart is how I expect the amount of tax paid by gender to look like. The difference between the two genders will be very huge.
